

Grove Brain Part Chart shows direction of anticancer flow(ie: how to kill cancer, start at the feet "Mo Molybdenum" beans, & work your way UP the wriggly turquoise blue line(Turks & Caicos blue eyes)...Montreal McGill U. source... . Flow of body starts at Zinc, so flow of kill starts at Mo -12...Next slide:Grove Brain Part Chart; Shows Lead, Aurum, Sugar, marked by Yellow square Boxes(circle source; square gallery toronto across from Art gallery of ontario), but does not show 4th square is Gallbladder Broca's area/wernicke's area mercury sodium area should be marked , I will correct that now)...Lead, aurum, sugar, mercury are indicators of aggressive/ antidote with zincs, potassiums, seleniums, magnesiums (glutathiones like Get-It Girl program cite from designer in Montana female anon)...Remarks: Tofu is indeed a phosphorus element, danger zone=ie:Tofutti products like popsicles are disallowed...Gerson, Sushi, Raw food diet & cure, are allowed...exemptions/ exceptions: Seaweed is an Iodine type thing which can contain Boron beware...p.s. they wash it with Boron to make it clean...Pranin B powder does contain Bo Boron...AS does Heavy Metals Defense Powder in stronger strength / Diatomaceous earth is a Bo Boron -12 beware strong...

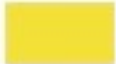

Sorry, I have been sleeping past 2 days, please forgive any typos in this post, cat on my lap..

Acetyl-L-Cysteine is the female format of an egg...Acetyl-L-Carnitine is the male format of an egg...Both are Aluminum on the Grove Body Part Chart technically...However...The female egg will contain more Titanium -3...The male version of the egg will contain more Al Aluminum +10...In the female the female is dominant...In the male the male is dominant...Each egg will contain either a male dominant or a female dominant side...The other side will be NON-dominant...In rare cases you will get a completely balanced egg...That egg is called a hermaphrodite or a totally balanced egg...Shells contain Calcium this is true...Calcium Ca is +5...Male dominant...Adrenal Gland...Ice cream might be Iodine dominant or Calcium dominant please check...Seaweed flavoured ice cream might be Iodine -8 dominant...(citation from Harvard/Radcliffe 1990 "Narlurlu" means "accustomed" in Japanese...Summer school Russian S.G. !)

Note for clarity sake...

Gingko Biloba is Licorice root Ga Cao in Chinese...

The capsules can be emptied into any drink (usually, because it is water soluble)...

Gingko Biloba is a Copper family thing...

If you have eaten Tofutti popsicles, use this to recover your diet...

If you need milk in your coffee or tea, you can use hot chocolate milk powder in unsweetened version that uses Splenda (a 4 potassium molecule family powder with only one molecule of sugar), to enhance your hot drink in winter...

You can offset the milk powder you drank with seaweed powder...

The Heavy Metals Defense Powder/capsules I mentioned in several Facebook messages as a Link, contains also BORON...Be careful with Boron as it is the strongest MINUS element on the chart...(I would think this might be male strength, as Mike Adams The health Ranger is male)

The Pranin B powder if you are in Canada, also contains Boron but slightly less... (probably more for female because it has that "Yoga" feel to it...the downward cat!)
