

THE ORDER OF THINGS: If a tumour is made up of all 12 PLUS elements, then start your attack from the outside & work your way in...

SO BEGIN YOUR ANTICANCER REGIME CHOOSING ALL THE PINK WORDS, STARTING FROM THE OUTSIDE, GOING IN TO THE CENTRE!

You want one of each of the MINUS(detox) column if you are doing anticancer!

Pitcher Plant is Zinc

holy basil, vanilla beans, hemp seeds, white willow bark are titanium

Grove Brain & Body Part Chart			
Brain ●	Body 📱	♀ Minus -	♂ Plus +
frontal lobe ●	thyroid 📱	zinc ●	lead ●
motor cortex ●	thymus 📱	manganese ●	iron ●
parietal lobe ●	lungs lymph nodes 📱	titanium ●	aluminum ●
medulla oblongata ●	heart 📱	potassium ●	aurum ●
pons ●	kidneys 📱	carbon ●	nitrogen ●
occipital lobe ●	pancreas 📱	selenium ●	sugar ●

Coloured Circles indicate colour in Fotoflexer

The flow of elements
The FLOW Alternates between MINUS & PLUS
ie: zinc lead manganese iron & so on

pancreatic enzymes, garlic, cayenne pepper are seleniums
apricot kernels, milk thistle, raw saffron are Oxygens
Madagascar periwinkle, vinpocetine & kelp are Iodines

Tamoxifen is an Iodine that removes calcium(Pr+)

licorice root is copper that removes phosphorus

Ginkgo Biloba is selenium
coffee is Copper

heat, saunas, infrared lightbulbs, ginger root, camu camu powder, fruits, Zincs

all nuts are manganese

Mugwort & Nutmeg are manganese

hawthorne, graviola, stevia, xylitol are potassium

All OILS are CARBON

ginseng is Oxygen

<http://www.grovecanada.ca>

Fluorine is in Moringa Oleifera plant

Boron is in small flowered Willowherb

apple cider vinegar is zinc that removes Lead

Bloodroot is a manganese that removes Iron

CBD Oil is a Titanium that removes Aluminum (cholesterol)

B17 is oxygen that removes Hydrogen
brain parts are sided in pairs (left or right side)

or have their own name for each part of the pair

Each body part contains 2 elements a Minus & a Plus
Each brain part controls a body part

hyperthermia: hot sauna cold shower, or hot & cold shower alternating, raises Zinc too

exercise raises magnesium

GroveCanada.ca

Hello...

The first picture is of a theoretical lump...If it was really gnarly & complicated...What it might be made of & how that would look...

The second picture is a chart...It looks complicated too, but isn't really...The chart shows 12 body parts...(look at the Vertical column called Body)...Those 12 parts start at the top of the body & work your way down...Down the chart, down the body...

In each body part there are TWO elements...The MINUS element detoxes that body part...The PLUS element feeds & repairs it...They work as OPPOSITES...

The Brain column just shows what brain parts control what body parts...

Ok...So back to the lump picture...If there is a lump in the body, then it will contain at its centre "Lead", then around that ball will be a layer of "Iron", then a layer of Aluminum, & so on, for every PLUS element on the chart, going down the page from top to bottom...

So the very outside of our theoretical very complex lump will be the last PLUS element on the chart, Molybdenum...

Now this pattern mimics the human body...Lead is your skeleton, bone...On top of that there is blood, Iron...On top of that is cholesterol, Aluminum...& so on...

Ok?

So say you want to get rid of that lump...
if the outside is made of Molybdenum, then you need its opposite, Boron, to dissolve that outer layer...

So, the order of dissolving this lump will be each MINUS element on the chart, starting from Boron & working your way UP the chart...

We are trying to dissolve each layer of the lump one by one...

Boron happens to be the strongest Minus element...

On the smaller chart below, you can see numbers beside the elements...

-12 is the strongest Minus element...

+12 is the strongest Plus element...

So for example, in the Liver, there is Minus element Oxygen with a strength of -7...

There is plus element Hydrogen with a strength of -6...

In the real world you find Oxygen in B17 or apricot kernels...

In the real world you find Hydrogen in water or ice or alcohol or juices...

Ok, so back to the order of things when trying to dissolve a lump...

Grove Body Part Chart

Organ	Minus -F Element	Plus +M Element
Thyroid	-1 Zinc	Lead +12
Thymus	Manganes -2 e	Iron +11
Lungs & Lymph Nodes	Titanium -3	Aluminum +10
Heart	-4 Potassium	Aurum +9
Kidneys	-5 Carbon	Nitrogen +8
Pancreas	-6 Selenium	Sugar +7
Liver	-7 Oxygen	Hydrogen +6
Adrenal Gland	Iodine -8	Calcium +5
Spleen	Copper -9	Phosphoru s +4
Gallbladder	Magnesi -10 m	Mercury +3
Colon	-11 Fluorine	Bismuth +2
Gender F or M	Boron -12	Molybdenu m +1

A smart protocol to dissolve a lump should start with,

Boron,

then Fluorine,

then Magnesium

Copper

Iodine

Oxygen

Selenium

Carbon

Potassium

Titanium

Manganese

Zinc...

Because theoretically, you are dissolving the outer layers of the lump first, then going inwards...

Now the next picture shows what typical lumps are made of...

Usually a benign lump is Calcium Oxalate(Calcium & Iron)...

A malignant lump is the same with the extra presence of Phosphorus...

So you would attack a benign lump first with Iodines, (opposite to calcium on the chart),

then with Manganese(opposite to Iron on the chart)...

A malignant lump you would begin with Copper(opposite to Phosphorus on the chart), then your Iodine(opposite to Calcium), then your Manganese(opposite to Iron)...

To dissolve the lump, remember, you are working your way backwards up the chart-because yu are reverting the lump to its earliest state, then finally dissolving it completely...

Many alternative protocols seem to begin with people doing intravenous Vitamin C...Now C is a Zinc family that removes

Lead...Great! BUT...if Lead is at the very centre of a lump, the C won't touch it...I think that is why many alternative protocols fail...Because people tend to do the C first...Which doesn't dissolve the outer layer of a lump first...So the C isn't touching the Lead...

But say you started your alternative anti-lump anticancer program with Boron & worked your way upwards through the Minus items? What real world things could you be doing?

Ok, here is an idea...

Boron, (found in small flowered Willowherb)

then Fluorine,(found in Moringa Oleifera)

then Magnesium (found in Magnesium supplements)

Copper (found in Licorice Root & in Coffee like the “Fused” instant Coffee from Rain, & green tea & its extracts catechins)

Iodine (found in Kelp & Iodoral pills & Dong Quai & Black Cohosh & seaweed & Vinpocetine)

Oxygen (found in B17 & apricot kernels & milk thistle & Ginseng & Butcher's Broom & Heavy Metals Defense Powder)

Selenium (found in Pancreatic Enzymes & garlic & selenium & Lysine & cayenne pepper)

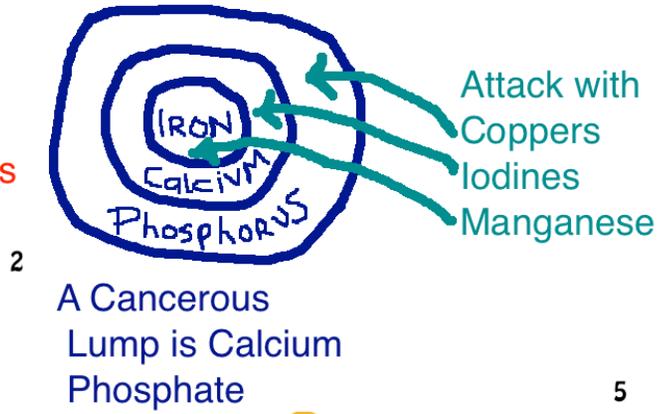

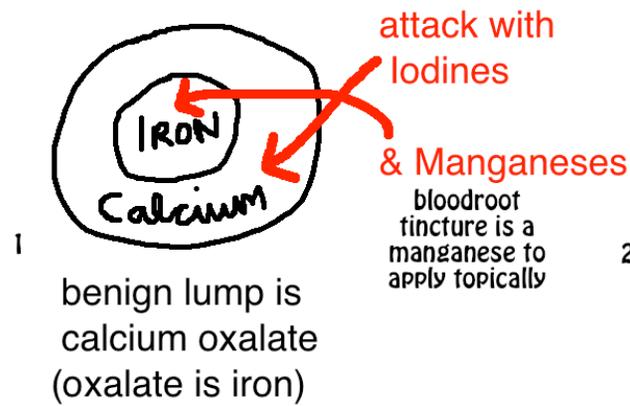

Carbon (found in Olive Oil & really all oils you like to eat)

Potassium (found in Stevia & Xylitol & in Graviola)

Titanium (found in Holy Basil & Hulled hemp seeds & Frankincense)

Manganese (found in Bloodroot capsules & all nuts & seeds like flaxseeds & sesame seeds & poppy seeds)

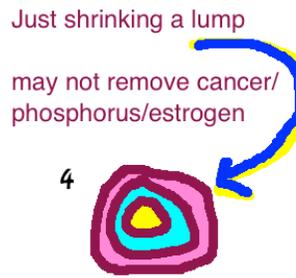

Zinc...(found in Humaworm antiparasitic-Wormwood, & in fruits & in Ginger root)

If you remove All Phosphorus you are left with a benign lump

Gender stands for the male prostate or the female prostate which is called Skene's Gland...

8

calcium is progesterone Pr+
estrogen is phosphorus Er+
Hydrogen is Her2+ (responds to B17)

Note: Zinc is the weakest remedy. Boron is the strongest... Choose the right strength for what stage you are at...

7

Grove Body Part Chart

Organ	Minus -F Element	Plus +M Element
Thyroid	-1 Zinc	Lead +12
Thymus	Manganese -2 e	Iron +11
Lungs & Lymph Nodes	Titanium -3	Aluminum +10
Heart	-4 Potassium	Aurum +9
Kidneys	-5 Carbon	Nitrogen +8
Pancreas	-6 Selenium	Sugar +7
Liver	-7 Oxygen	Hydrogen +6
Adrenal Gland	-8 Iodine	Calcium +5
Spleen	-9 Copper	Phosphorus +4
Gallbladder	Magnesium -10 m	Mercury +3
Colon	-11 Fluorine	Bismuth +2
Gender F or M	Boron -12	Molybdenum +1

6 As "Cancer" progresses, the larvae grow into a worm... So you need a stronger remedy, the further it is along...

5

larvae

worm

Ok...So that is an idea of how to approach a protocol to remove a lump from your body...

Each element on the Chart represents a whole family of things...

The Grove Health Science books helps to point out many of your options in the real world...

You have to choose for yourself what you can afford, what you like, & how much to take...

If there is cancer present, more is better, since herbs tend to be pretty weak...

There are instructions for how to do Diagnostic Imaging yourself on my site <http://www.grovecanada.ca>

If you can learn how to do that, then you will be able to better see what the lump you are trying to get rid of is made of...

Ask me for help if you need it...

Sari Grove on Facebook, friend me first, then message me...I can edit a picture for you if you need help with that...

This work is always a work in progress, & might be updated along the way...

So be sure to check for corrections along the way...

I make mistakes like everybody else...Possibly more than everybody else...Lol!

Sari Grove(Sari sounds like Mary)
