

**NIDI (Non Invasive Diagnostic Imaging)...Take a photograph yourself, of yourself, & edit it using an online web portal located at [DIYImaging.com](http://www.diyimaging.com/) & find out 3 parameters:**

- 1)Cancer/Lyme(Phosphorus estrogen er+ marker)(mercury),
- 2)Lead Iron Aluminum(cholesterol) Hydrogen(her2+) Calcium(pr+ progestins),
- 3)Inflammation(injury or tumour sites)...

**The free open source manual method of editing is the idea & method of invention, behind the code of the new site <http://www.diyimaging.com/> ...(which just automates the 3 manual methods)! NIDI fills the gap when needle biopsy is not available, is not done, cannot be done...NIDI also serves as thermogram, & Do it yourself monitoring for many other imbalances...The applications for cancer are only the tip of the iceberg...**
